Dr. Cooper Says the Old Man Is Demented.

No Doubt of His Attempt to Starve

There were enough witnesses, however. Physicians, detectives and other who had seen the woman were read; to testify.

that when she became ill, and no longer

sneed one of his relatives calling to see him.

The night in the station-house did not seem to affect his appearance any, and he tooked as fresh and cynical as ever this morning.

As he was bundled into the police patrol wagon with a number of other prisoners, no one would imagine that he was of such an age. In fact, his wife, who is only thirty-six years old, looked more his age, owing to her want and suffering.

Little ceremony was used in putting the old man downstairs in the basement of the court, and while there he sent for Lawyer Charles E. Kurth to defend him.

When the case was called he walked with a firm step to the bar, and listened patiently to the charge while it was being read to him. The charge or complaint was embodied in the affidavit made by Detective Delahanty, in which he told of the woman's condition when he found her, of her statements to him that she had been starved, and the statements of those who had aided her. "Are you guilty or not guilty?" asked Justice Haggerty, but the old man by way of reply cast an inquiring look upon his lawye."

Not suilty:" responded the latter." and we desire an examination."

Friday next was the time set for the examination, and Stratton was held in \$2.500 ball.

One of the policemen present offered.

One of the policemen present offered to assist him downstairs again, but he waved him impatiently aside and walked lightly down the stairs himself, the lawollowing.

"Well," said the policeman, "in my opinion, Mr. Stratton is overbearing. Irritable, impulsive, urratic and violent. Her life is not, in my opinion, safe with him alone. There are saner men under restraint than he is. A commission of lunacy should be appointed to accertain his sanity, for I do not think

"Then in your opinion," asked the Court, "is this attempt to starve his wife to death the work of an insane man, or was it deliberate on his part?"
"In my opinion it was the work of a man demented. I do not think he is legally responsible." a man demented. I do not consider the legally responsible."

A messenger was then sent for Lawyer Rurth, and the statement made by Dr. Cooper read over to him. The Court said that the statement put a much different complexion upon the

Dr. Cooper read over to him. The Court said that the statement put a much different complexion upon the case.

"In view of it," he went on, "I must decline to admit the prisoner to bail to-day, because if he is insane he is not a fit man to have at large. The best thing you can do is to hurry at once to the Commissioners of Charities, explain the case fully and they will send competent physicians to examine him. It can all be done in a day or so, and it will not hurt him to spend a night or so in a prison or station-house."

The lawyer said he fally agreed with the Court, and after seeing his client again he hurried off to see the Charities Commissioners.

Meantime Dr. Rushmore, who lives near the prisoner, held a long conversation with him, and came to the same conclusion as Dr. Cooper, Few of the neighbors, however, saw the matter in that light, and nearly all are anxious to see him punished.

The house, 124 Gates avenue, where the half-starved wife is lying, was an object of curiosity to passers-by this morning, nearly every one stopping to look at the building. Mrs. Stratton is overjoyed at the change, and has now all the food she can possible take, and a physican is in attendance upon her.

It is doubtful, however, if she will be able to be out again in several weeks. She is literally a living skeleton. How she is has no idea of the extent of her husband's wealth, save that he ownsh whoses all over this city. She was a victim of his ill-treatment for nearly two years, but it was only within the past few months that he tried the policy of starving her to death.

The old man has several grown-up children by a former wife, but he has not allowed any of them to cross the threshold of his home in many years.

but too late to win.

A like fate may befall this great colt in the Suburban, for this "sport of kings" is the most uncertain of games. With any kind of luck, however, Lamplighter seems bound to win.

He has started several times this Spring, and every time he has scored a bracket save in the Brooklyn Handicap. He is a powerfully built colt, and weight does not affect him in the least.

His brilliant performances as a threeyear-old proved this, for in nearly all of his races he gave away pounds of weight to older horses, and beat them handliy. Just how good Lamplighter really is no one knows. Weight for age, he can probably beat any horse in the country, bar one, and that one is Tammany, the four-year-old son of Iroquois, owned by Marcus Daly.

Many believe that Tammany can han-die Lamplighter in the same casy fash-ion that the latter does other horses. Last year this pair dodged each other, and up to a week ago it seemed certain that the two great colts would meet in the Suburban. Unfortunately Tam-many threw out a splint, and so this pleasure is to be denied the true lovers of the sport.

Later Mr. Dwyer changed his mind and decided that as Hanquet's chances looked very rosy he would have a shy at the big stake. Hanquet has the reputation of newer being a good horse in the Spring. This season, however, he has come around earlier and seems to be in grand shape.

Banquet seems able to handle any of the others in the race, and he ought to be close to Lamplighter at the finish. Charade, the winner of the Metropolitan, will be withdrawn. He will have to carry 117 pounds, and he showed conclusively last week at Morris Park that he could not carry that weight and go a distance.

His Highness has gone lame and is not a probable starter. Judge Morrow is to be taken to Chicago, and Diablo, the hero of the Brooklyn, is not a starter. The field to-morrow will probably consist of the following horses:

Field was indicted three times for lorgery and twice for grand larceny. District-Attorney Nicoli himself appearing as complainant.

Then Field, who was on \$25,000 ball on each indictment, was lodged in Ludlow Street Jail instead of the Tombs, because his relatives alleged that his mind was upset.

Presiding Justice Van Brunt, of the supreme Court, committed Field to the State Hospital for the Insane, at Buffalo, and Supt. Andrews was directed to hold him in custody for observation as to his mental condition, and to report to the Court when he had recovered.

and to report to the Court when he had recovered.

Supt. Andrews has not made any report, but rumors have come from Buffalo that Fleid was permitted to roam about the city alone and at his sweet will.

These rumors were denied, but Dr. MacDonald has been in Buffalo, and what he says on the subject is startling, to say the least.

Dr. McDonald says that Edward M. Fleid has not been kept like a prisoner at all. When he discovered this state of affairs he ordered Supt. Andrews to confine the patient.

"I talk with Mr. Fleid every time I go to the Buffalo sayjum," says Dr. MacDonald, "and he seems as sane as any man. He told me himself he had been allowed to wander about and go around Buffalo without an attendadt.

"I told Dr. Andrews, who is in charge."

me himself he had been allowed to wander about and go around Buffalo without an attendact.

"I told Dr. Andrews, who is in charge there, that it was a funny way to treat an insane patient under criminal indictment and committed to the hospital by order of the Court for observation.

"I understand, however, that some of his privileges have been taken away on account of something he did in Buffalo, and that now he is a sort of errand man with little to do but answer the telephone.

"It is not in the power of the State Commissiover in Lunacy to discharge a patient held under the order of the Court," concluded Dr. MacDonald, "or I should certainly discharge Field into the custody of the Sheriff of New York. I never believed he was insane. I have been misquoted as testifying that he was insane."

"I did make a certificate based on the history of the case that he was suffering with acute medonenoils, a quite different thing. But when I made a personal examination of him I find him to be shamming fee paid to me by his friends."

District-Actiorney Nicoli said to-day:

"I have recently had a talk with Dr. Mac-bonald, and I shali call the attention of Presiding Justice Van Brunt to the matter, and ask that Field be brought down for trial.

"I was always convinced of his sanity, and I could convict him in a day before any jury, but, of course, should the Court ask for a report from Dr. Andrews he would report that I field was still unrecovered; perhaps that he was recovering, but not yet fully recovered."

The condition of Broker William H. Henriques, who was assaulted by Frank Ellison, ten days ago, is still so Frank Ellison, ten days ago, is still so critical that two physicians are in daily attendance upon the sick man.

Since Dr. Wynkoop, first called in Dr. McBurney for consultation last Monday, the latter, in conjunction with Dr. Wynkoop, has been treating Mr. Henriques. Dr. Wynkoop, when seen this morning, said that his patient passed a fairly comfortable night, and showed slight improvement this morning.

From present symptoms, the physician said, it is impossible to say whether or not the crisis is passed. Sharp pains in the head and vertico are still alarmingly frequent, and may yet prove fatal. In the meantime, Frank Ellison, Mr. Henrique's assailant, is in Jefferson Market Court Jail. He will have a hearing to-morrow, and then will probably be turned over to District-Attorney Nicoli's jurisdiction, who is to present the case before the Grand Jury.

## PLANT THAT SHEDS LIGHT.

Wonderful Qualities of a Flower Familiar in India.

Familiar in India.

In India I once witnessed a most remarkable phosphoric light issue from a giant flower, called by the natives "bedswar," says a writer in the Chicago Inter-Ocean.

The flower was nearly six inches in diameter, and of a deep red color, but with yellowish petals. My attention was called to the luminous radiations of this beautiful plant by a guide, and we used to visit the garden every morning two hours before sunrise to observe this fascinating spectacle. This was during the months of July and August.

The light, although most brilliant in the early morning twilliant in the early morning twillight, but not after total darkness came on. This led me to believe that the light was not emitted from the flower itself, but that it was reflected.

To determine this, I placed one of the nowers in a perfectly dark, that is, light, tight room, where I knew the air to be perfectly dry, and not the faintest spark could be seen.

This might have been cased by the broken stem, but I am of the opinion that the light was reflected, as it was quite intense and could be seen at a distance of several feet. When viewed closely the petal resembled a miniature incandescent electric lamp.
